Bangalore, India

Professional Summary

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning, with hands-on internship experience building real-world AI applications. Skilled in Java, machine learning libraries, and full-stack fundamentals (HTML, CSS, JavaScript), with a strong foundation in Data Structures and Algorithms. Proven ability to independently design and develop end-to-end AI/ML projects, including classifiers, conversational agents, and voice-assisted systems.

Experience

Unlox Academy Jan 2026 – Mar 2026
Artificial Intelligence Intern

- Applied machine learning algorithms to design and build real-world AI applications during a hands-on internship program.
- Developed practical ML projects using Python and industry-standard machine learning libraries, strengthening implementation and problem-solving skills.

Projects

Road Sign Classifier | Machine Learning, Python

- Built a machine learning-based road sign classifier that detects road signs and outputs confidence scores and accuracy rates.

RNN-Based Chatbot | RNN, RAG, Python

- Developed a conversational chatbot using RNN architecture combined with Retrieval-Augmented Generation (RAG) to enhance query assistance accuracy.

AI Agent-Driven Smart Campus Virtual Tour & Query Assistant | AI Agents, Chatbot, Voice Assistance

- Engineered an AI agent-driven virtual campus tour system for the EdTech domain, integrating chatbot and voice assistance functionality for interactive query resolution.

Skills

Languages & Web: Java, HTML, CSS, JavaScript

Core Concepts: Machine Learning, Data Structures and Algorithms

Education

Global Academy of Technology, Bangalore	Aug 2023 – Jun 2027
<i>B.E. in Computer Science and Engineering</i>	<i>CGPA: 7.01</i>
Narayana PU College	2023
<i>XII (State Board)</i>	<i>76%</i>
Bunts Sangha RNS Vidyaniketan	2021
<i>X (ICSE)</i>	<i>88%</i>
